RUBBER PLANTATION & RUBBER PRODUCTION

SKILL DEVELOPMENT PROGRAMME

PROJECT REPORT / DETAILED PROJECT REPORT

Proposed Project Cost:
₹ 5.00 crore

Training Duration:
15–21 days per student

Training Cost:
Maximum ₹ 10,000 per student

Additional Support:
Approximately ₹ 5,000 – ₹ 7,000 per student

Near Shri Krishna Paradise, Sector-12, Kharghar,
Navi Mumbai, Maharashtra – 410210

Skills for Today
Sustainable Livelihood
for Tomorrow

1 Executive Summary

The Rubber Plantation & Rubber Production Skill Development Programme is designed to provide practical and employment-oriented training in rubber cultivation, tapping, processing and value addition. The programme equips beneficiaries with technical skills, certification and post-training support to help them secure employment, start their own micro-enterprises or pursue MSME registration and related opportunities.

The project is planned for **2,500** direct beneficiaries in approximately 100 batches of 25 students each. Each beneficiary will receive 15–21 days of structured training, with a maximum direct training cost of ₹10,000. Additional support of ₹5,000–₹7,000 per beneficiary will be provided for certification, job affiliation/linkage, MSME certification/ registration and assistance with MSME loan submission. The balance of the project cost will be allocated to trade-specific tools, materials, expert support, practical facilities, monitoring and programme management.

2 Project Profile

Project	**RUBBER PLANTATION & RUBBER PRODUCTION SKILL DEVELOPMENT PROGRAMME**
Implementing Organisation	Swa. Manjulabai Shankkrao Mane Samajik Shaikshanik Sanstha
Total Project Cost	**₹ 5.00 crore**
Direct Beneficiaries	**2,500** students
Indicative Batch Size	25 students
Indicative Batches	100
Training Duration	15–21 days/student
Training Cost Cap	₹ 10,000/student
Post-Training Support	**₹ 5,000**–₹ 7,000/student

3 Objectives

- Provide practical, employment-oriented technical training.
- Develop skills for wage employment, self-employment and micro-enterprise creation.
- Provide hands-on practice, demonstrations, assessment and certification.
- Facilitate employment/job affiliation and enterprise linkages after training.
- Support MSME registration/certification and loan-submission processes.
- Promote sustainable livelihood and income-generation opportunities.

4 Training Structure

The training period will be 15–21 days per student. The detailed daily timetable may be adjusted according to the trade, practical requirements and local implementation conditions while retaining theory, demonstrations, practical learning, assessment and post-training orientation.

Module	Indicative Content
Module 1	Rubber cultivation basics, plantation planning and selection of suitable planting material.
Module 2	Land preparation, layout, spacing, planting procedures and initial plant care.
Module 3	Plantation maintenance, manure/fertiliser, moisture management, pruning and basic pest/disease awareness.
Module 4	Rubber tapping: suitable trees, tapping methods, tools, safety and tree health.
Module 5	Latex collection, clean handling, storage, transport and basic quality considerations.
Module 6	Basic rubber processing, drying, handling, packaging and primary production practices.
Module 7	Entrepreneurship, production planning, pricing, record keeping, market identification and buyer-seller linkages.

5 Training Methodology

Classroom sessions, technical presentations, demonstrations, practical/field sessions, hands-on exercises, group discussions, expert guidance, assignments and assessment/ evaluation will be used. Practical learning will be the principal focus.

6 Beneficiary Support & Linkages

Approximately **₹5,000–₹7,000 per student** is proposed for completion certification, job affiliation/employment linkage, MSME certification/registration assistance and assistance in preparing/submitting MSME loan applications. Actual statutory or third-party charges, if any, will follow prevailing rules and applicable schedules.

7 Project Resources

Resource	Purpose
Rubber saplings / planting material	Demonstration and practical plantation establishment.
Plantation and tapping tools	Agricultural tools, tapping tools and safety equipment.
Processing equipment	Latex processing, drying and packaging.
Training infrastructure	Classroom, practical field, demonstration plots.
Experts / trainers	Technical training, guidance and assessment.
Monitoring & evaluation	Quality, progress and impact assessment.

8 Expected Outcomes

- Skilled and certified 2,500 youth and community members.
- Increased employment and self-employment opportunities.
- Growth in MSME units and local enterprises.
- Improved income and livelihood for rural and semi-urban families.
- Contribution to sustainable agriculture and green economy.
